

The background of the image is filled with numerous concentric circles of varying sizes. Most circles are composed of black and white lines, creating a hypnotic, optical illusion effect. One prominent circle in the lower right quadrant features a red and white color scheme. The text 'AFRICAN FABRIK SCHOOL' is centered in the upper half of the image.

**AFRICAN
FABRIK
SCHOOL**

AFRICAN FABBERS SCHOOL

the talk will launch the african fabbers school project, the first school of urban ecologies, self-construction and digital fabrication in africa. the school will be realised in cameroon by paolo cascone with the urban fabrication laboratory in the framework of the project CAM'ON promoted by the COE ngo (associazione centro orientamento educativo) with the support of AICS – italian agency for development cooperation. the afs research and educational programme is based on the idea of bridging the african and the european artisans and designers through community oriented projects, workshops and applied researches. this with the aim of exploring the interaction between african material systems and digital manufacturing technologies for sustainable living.
